Payment enquiries to Sandy Hayward treasurer@agia.org.au

1.00pm

Registration

1.15pm

Welcome and introduction

1.30pm

Session 1

Data Metallogenica - the principal database of samples, data and information on the world's mineral deposits past, present and future

Joe Cucuzza, Managing Director AMIRA International

- What is Data Metallogenica?
- Preservation of physical samples from mines past and present
- An on-line database: access to data and information
- Extracting value from DM: search, research, training
- Plans for the future

Keeping petroleum data alive - the GSWA experience

Felicia Irimies, Manager, Petroleum Exploration Information, GSWA

- Preservation of different types of physical items: petroleum reports, tapes, microfiche, seismic sections, etc.
- Maintaining currency of media/formats
- Government role in preserving data (statutory requirements)
- Confidential vs. open access
- Record system and legislation

Geoscience legacy data and collection management in South Australia

Julie Roberts, Business Analyst, Knowledge Information and Data, Santos Ltd

- The Santos experience
- AESIS: Accessing legacy data via Informit

Shelagh Krummel, Volunteer Map Project Co-ordinator, University Libraries, University of Adelaide

- A legacy map collection at the University of Adelaide
- Resources and Energy Group, Department of State Development, SA: Adding value to geoscientific data for exploration - *authored by Pam Aagard, Librarian, Geoscience Library, Resource Information of the Resources and Energy Group, Department of State Development, SA*

THE AUSTRALIAN GEOSCIENCE INFORMATION ASSOCIATION INC.

3.00-3.30pm **Afternoon tea**

3.30pm **Session 2**

Mining for value in Iluka's legacy data systems

Sarah Pinfold, Information Analyst, ILUKA

- Identifying information of business value within repositories that may be unmanaged, inactive, orphaned or lost
- Defining data and identifying ROT (redundant, obsolete, or trivial) material within unstructured information
- Categorising information in order to apply auditable policies to enable the migration or defensible disposition of targeted legacy data

Oh what a legacy! The WAMEX (WA Mineral Exploration Report) experience

Ann Fitton, Manager, Mineral Exploration Information, GSWA

- What is WAMEX, and some impressive database stats
- Data in time: from microfilm to online submission
- Metadata: Bibliographic data sheet and drilling/sampling data
- Data delivery via GEOVIEW.WA
- Extracting value: mineral drillhole and surface geochemistry offsets
- Selling the message: why this is worth every dollar spent on it!

Legacy data - lessons learned (and ignored) from the past

Guy Holmes, Director, KDM SpectrumData

- A brief history of data storage
- Our past mistakes
- Lessons learned?
- History repeating itself

Panel discussion

5.00-6.30pm **Sundowners**

Register online at <http://www.trybooking.com/151381>
